

To Whom It May Concern,

During the period of August 20 through September 16, 2011 CDIS, Inc. installed 84-dual-port network drops in existing offices, cubicles and new cubicles as they were constructed. During this period some of our personnel were working in existing offices and cubicles while others were temporarily relocated. In August they prewired as much as they possibly could staging cables in ceiling areas above where they would be dropped. Because they did this, on the weekend of September 10 we were able to move everyone in existing and new work spaces to the new Cat-6 network without any issues. Throughout this project CDIS willing adjusted to schedule changes and their CDIS staff performed their services in a professional manner without inconvenience to our staff. As the supervisor for this network upgrade from Cat-5 to Cat-6, I would engage them for another project and highly recommended them.
